

DESKTOP COMMUNICATION

BOOSTING EMPLOYEE EFFICIENCY

INTERNAL COMMUNICATION KEY IN GROWING AND CHANGING ORGANISATIONS

Engaged employees can bring a 20 – 25 % boost in productivity. Upgrading the internal communication especially helps them feel more connected. A key issue for a lot of organisations or government agencies that are focussed on working more efficient.

What if you could send scheduled or instant updates, inspire employees with key data, newsletters and presentations, communicate with remote network branches or have a critical system status delivered to a select group of people? Connect with everyone, select groups or even individuals. Inform your staff with a screensaver, or send active messages with automatic pop up desktop alerts.

Extend your internal communication and connect to all desktops, laptops and tablets in your network with PADS4 Messenger and PADS4 Desktop Viewer.

A POWERFUL SOLUTION FOR INTERNAL COMMUNICATION

PADS4 is a powerful internal communication tool. The PADS4 Desktop Viewer and Messenger give you the possibility to send instant messages to any desktops, laptops or tablets throughout your entire organization.

The Alert function allows for urgent messages to appear instantly. Plus, with detailed feedback and read receipts, you can easily track your communication.

Send messages

Easily activate popup messages. Whether it's one single desktop, or thousands around the world, PADS4 Messenger shares your message in real time.

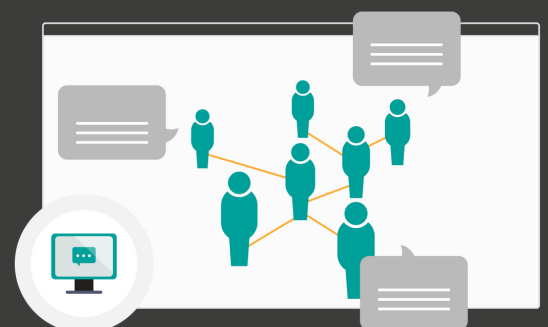

Use screensavers

Set PADS4 Desktop Viewer as a screensaver to play presentations, automatically or by manual viewing. You can allocate different presentations to different departments or locations.

Inform employees of interesting facts and figures, offer inspirational presentations or videos, or send an alert regarding policy changes or deadlines. You are in full control of who gets your message and when.

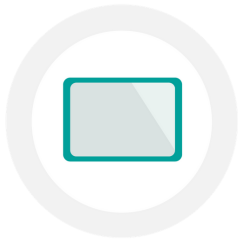

PADS4 DESKTOP SOLUTIONS

- Inform, train and inspire staff
- Detailed feedback and read receipts
- Easy MSI deployment
- Full LDAP integration

PUBLIC SERVICE COMMUNICATION MADE EASY

PADS4, the all-in-one platform for public service announcements

INFORM YOUR CITIZENS

With public screens government authorities can easily inform citizens within public buildings and even outside the premises. Welcome citizens and guide them with dynamic wayfinding, incorporate queue management systems to decrease perceived waiting-time and share new regulations and crime alerts. Also, offer real-time information such as weather, news and public transportation updates to increase your public service.

MANAGE STAFF INFORMATION

Next to display communication targeted on citizens, you can also use the software to send instant messages and push notifications directly to individual desktops in the same digital signage network – opening up what could prove to be a crucial channel of internal communication for authorities.

This allows instant communication with a large number of public service workers during city-wide and regional transformation. In times of change, such as the transition to a smart city, good internal communication is crucial to ensure optimum productivity and morale. PADS4 technology can help authorities to streamline and control internal messaging from a central location, providing a useful tool whether organizations are deploying a long-term internal communications plan, or managing a last-minute crisis.

DATA DRIVEN SIGNAGE SOFTWARE

PADS4 is a powerful all-in-one digital signage platform. Transform data sources into smart and versatile signage, including advertising, wayfinding, internal communication, queue management and corporate branding.

Meet the needs of industries with complex internal and external communication problems, by integrating all your data sources and screens. PADS4 supports real-time data integration, logic programming, and dynamic digital signage for advanced visual communication that is targeted and personalized.
